Young Entomologists' Day

20th February 2010

As part of the celebrations for the 75th birthday of the Amateur Entomologists' Society and the Bug Club, we are inviting young entomologists to join us in a day of insect talks and activities.

You will have an opportunity to give a talk, visit the insect collections and meet with other young entomologists at Oxford University's famous Museum of Natural History.

In addition to behind-the-scenes tours of the Hope Entomological Collections, there will be insect related activities, including opportunities to cuddle a cockroach and tickle a tarantula.

Information displays will also be on hand about the Bug Club, National Insect Week events in 2010 and the new UK Biodiversity Centre based at the Natural History Museum, London.

Children (any age below 18) are invited to give a short talk on an insect related topic. The talks will be judged by a panel of experts, and prizes will be awarded for the best presentations, taking into account the age of the presenter.

For further information and a booking form please contact the secretary of the Amateur Entomologists' Society in the first instance: e-mail secretary@amentsoc.org, or write to The Bug Club, PO Box 8774, London SW7 5ZG.

The Bug Club is jointly run by the Amateur Entomologists' Society (Registered Charity no. 267430) and the Royal Entomological Society of London (Registered Charity no. 213620) and exists to encourage the study of insects and natural history by young people.

AES 75th Anniversary Young Entomologists' Day Outline timetable

Venue: Oxford University Museum of Natural History
Date: 20th February 2010

- 10.30 Arrival, settle in
- 11.00 Introduction & welcome
(AES President, Dr Robin Wooton)
Review outline of the day
- 11.15 Presentation (Guest Speaker TBA)

Presentations

- 11.45 9 & under category
- 12.15 10-13 age category
- 12.45 Lunch break
- 1.45 14-18 age category
- 2.15 Judges' deliberations
- 2.30 Prize-winners' presentation & wrap-up
- 3.00 Close

Tours of the Hope Entomological Collections

Information stands will include The Bug Club, National Insect Week
and the Angela Marmont Centre for UK Biodiversity.

GUIDELINES FOR PRESENTERS

PLEASE READ THIS PAGE CAREFULLY

The most important thing about the presentations during the day is that you enjoy talking to others about entomology. We want you to have fun, and if you enjoy talking about something that is important to you, we will enjoy hearing about it!

Children should not feel that this is a formal event, we will do all we can to re-assure you and help you to enjoy the day. The information below is just to help you to know what to expect in the talks, and what the judges will be looking for.

JUDGING CRITERIA

The people judging the talks are very experienced and also very open-minded. We want you to do your presentation YOUR way, whatever that may be. Some of you will find it helpful to have some guidance, so we have provided some below, but please come along and give a talk even if it doesn't follow this loose framework!

1. Age categories

Children's contributions will be judged in three age groups, as follows:

9 & under 10-13 years 14-18 years

2. Allocation of marks:

Marks will be awarded for content and presentation,

Content 60%

Presentation skills:

 Delivery 20%

 Structure and time 10%

 Audience engagement 10%

3. Content:

All presentations **MUST** relate to entomology, but this will be broadly interpreted to include creatures commonly referred to as 'bugs' or 'creepy crawlies', even if they are not insects - such as snails, scorpions, spiders, millipedes etc. Judges are hoping for **EITHER** breadth or depth, or a balance between the two.

Breadth **MIGHT** be gained by linking to areas of science (biology, chemistry, physics, evolution, conservation, etc.) or links to other disciplines and practical activities (geology, ecology, history, photography etc).

Depth is likely to be in terms of a detailed focus on your main topic, which MIGHT include such elements as culturing live specimens, taxonomy or habitat associations etc.

Clearly, when judging content the judges will take into account the age of the presenter. Older presenters, for example, are likely to have researched their topic, and to have a more creative and evaluative response than younger children, who may just want to talk about some insects that interest them.

4. Presentation skills

Delivery: Here we mean the way the presenter speaks: do they speak clearly and confidently? Is there (for older presenters) over-reliance on notes? For the older presenters we would expect fluency in their talk, with some awareness of the audience, eye contact and good clear responses to questions at the end.

Structure and time: Here the judges will want to see that children can talk within the maximum time limit given below, and that their talk is planned. For younger children this may be a very loose structure, older presenters will provide a clear beginning, middle and end.

Audience engagement: Presenters will be judged on their ability to use their voice, body, any visual aids and the available space to engage the audience in their presentation. There is NO OBLIGATION to use supporting material at all, but where it is used, we would hope that any visual aids will be well chosen to enhance the audience's experience, and will be integrated with confidence into the talk. The younger children may simply want to build their talk around an object of interest; older presenters may like to bring models, photographs, PowerPoint, poster boards, or any other visual aid.

5. Time limit

There will be a time limit for all presentations, as follows:

9 & under	4 minute maximum
10-13	6 minute maximum
14-18	10 minute maximum

6. Procedure

Presenters will give their talks in the order that their booking forms were received, as far as possible. A gentle reminder will be given one minute before the end of their allotted time in order to help presenters keep to time. All presenters will be asked questions by the judges at the end of their presentation. You will be given a feedback sheet at the end of the day. Feedback will consist of general comments on your presentation, no specific grade will be given.

7. Equipment

We will make every effort to ensure that any equipment requested functions smoothly. It is your responsibility to make sure that any media you bring (e.g. PowerPoint slides) are compatible with Microsoft PowerPoint 2007 and Windows Vista. However, please be aware that technical equipment does occasionally go wrong, even on the most important occasions. Sometimes this adds a bit of spice to an event!

Good luck on the day, and have fun!
